```
✓ Reworks / DetailView
  ⚛ ButtonFooter.tsx
  TS constants.ts
  TS helpers.ts
  TS queries.ts
  ⚛ route.tsx
  ⚛ SubmitConfirmationModal.tsx
```

Where we are

- Some routes already use new data loading
- Slowly adjusting route folder structure to [Remix recommendation](#)
- Using openapi-fetch to get typed data from backend OpenAPI definitions

```
import type { Document } from "~/src/api/remix/data";
import { apiFetch } from "~/src/api/apiFetch";
import { ZMS_CATEGORY_IMAGES, ZMS_LQV_TAG } from "~/src/api/openapi";

const data: {
  items?: ({
    uid: string;
    createdAt: string;
    updatedAt: string;
  } & {
    fileName?: string;
    path?: string;
  })[];
} = await fetchClient.GET("/documents", {
  params: {
    query: {
      orderId,
      category: ZMS_CATEGORY_IMAGES,
      tagsAnd: [ZMS_LQV_TAG],
      limit: 500,
    },
  },
});
```
