

# Where we are

- Some routes already use new data loading
- Slowly adjusting route folder structure to [Remix recommendation](#)
- Using openapi-fetch to get typed data from backend OpenAPI definitions

```
import type { Document } from "mongoose";
import { apiFetch } from "~/src/api/apiFetch";
import { ZMS_CATEGORY_IMAGES, ZMS_LQV_TAG } from "~/src/constants";

type Document = {
  uid: string;
  createdAt: string;
  updatedAt: string;
  fileName?: string;
  path?: string;
};

export const fetchDocuments = async (orderUid: string) => {
  const { data } = await fetchClient.GET("/documents", {
    params: {
      query: {
        orderUid,
        category: ZMS_CATEGORY_IMAGES,
        tagsAnd: [ZMS_LQV_TAG],
        limit: 500,
      },
    },
  });
};
```
