Where we are

- Some routes already use new data loading

```
{/* Calendar */}
<Route path={CALENDAR_URL}>
  <Route index element={<Navigate replace to="calenda
  <Route
    path=":viewOption"
    element={
      <AuthCheck routeType={[RouteType.INTERN_ROUTE]}
        <CalendarContainer />
      </AuthCheck>
    }
  />
</Route>

<Route path={APPOINTMENTS} lazy={() ⇒ import("../page
```

```typescript
export async function loader({ request }) {…
}

type LoaderReturnType = Exclude<Awaited<ReturnType<typeof loader>>,

export type SelectedPartners = LoaderReturnType["selectedPartners"];

export function Component() {…
}

Component.displayName = "Appointments";

export function ErrorBoundary() {…
}
```
